It's just that simple. Access to Capital for Entrepreneurs, Inc. (ACE), through our Georgia Green Loan (GGL) program, makes loans every day to help Georgia's small businesses, statewide, reduce their energy costs and improve their sustainability.

Good examples of companies seeking to improve energy efficiency through improved facilities and operations include restaurants that may have high utility bills, installers of home insulation products and lighting retrofits. The list goes on and the word is out. ACE and GGL are your partners in creating an eco-friendly environment and attracting environmentally-conscious customers.
